

Unlocking (registering) Race Analyzer

Race Analyzer is copy protected. This protection is necessary to provide our customers with easy access to the most recent updates on the web site

<http://www.parametrix.org/>

When you run the program for the first time, a registration file is created. The PC Guard window (see picture) will be displayed when you run the program with <SCROLL LOCK> key on. The application status is set for "EVALUATION".

The PC Guard window

The program will run in fully functional mode for 30 days, after which the software will cease to work without proper unlock key (Init code).

How to obtain Init code

In order to generate **Init Code** for your PC, we must receive **MID** and **Site Code** from you first. These values are prominently displayed in red fields at the top of PC Guard window.

Combination of **MID** and **Site code** represents a unique remote computer "fingerprint signature" that uniquely identifies target PC.

⚠ Please note that **Init Code** will only work for a PC that it was generated.

Step 1. Submit **MID** and **Site Code** to Parametrix via e-mail or web mail.

E-mail MID and SITE CODE directly to alex@parametrix.org

In order to submit MID & Site code via web site, you must first create an online account and be logged in to the site.

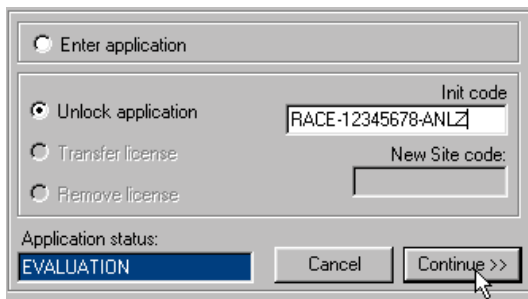

Link to create an account is provided in e-mail sent to you from Parametrix Research on the date when you purchased software.

Link to submit MID & Site Code online:
<http://www.parametrix.org/regsoft.php>

Step 2 Unlock software.

Run the application with <SCROLL LOCK> key on. Select “Unlock Application” radio button and type the Init Code, received from Parametrix.org

See picture below.

Step 3.

Click [Continue >>] button. The program will be registered, and Application Status will change to “Registered”. Days Left indicator will display N/A.

How do I transfer license to another computer?

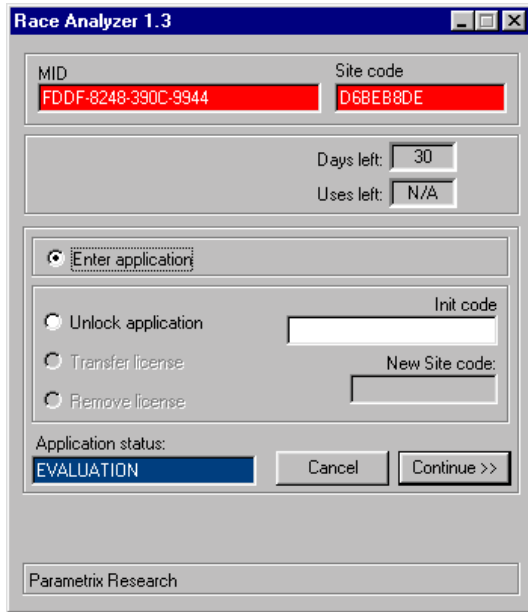

Init code is only valid for a computer that it was issued. If you decide to use Race Analyzer on a different computer, you must transfer the existing license to the other computer.

! **NOTE:** Do not uninstall the software from your old computer, because you will not be able to transfer a license as described here.

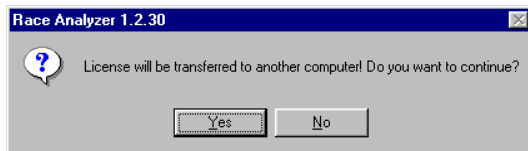

Please follow these steps:

1. Install Race Analyzer on a new PC.
2. Obtain the Site Code from the new PC.

3. Run Race Analyzer on the PC that is currently registered. PCGuard window will appear on screen.
4. Select **Transfer License** radio button.
5. Type your current Init Code and NEW Site Code from the new PC. (See picture below)

6. Click [Continue>>] button. You will be asked to confirm your intention to transfer license. Choose “Yes”

New Init Code will be generated and displayed in the window (see picture). Please write down the Init Code.

You can register your program on new PC using NEW Init Code.

⚠ Important: after you transferred current license to a new PC, the software application will become unregistered and will no longer work on the old PC.

Uninstalling Race Analyzer

To uninstall Race Analyzer, please use standard Windows **Add/Remove Programs** feature included with your Microsoft Windows operating system. For most Windows OS, click on Start>Settings>Control Panel> Add/Remove Programs
